MAKING YOUR COLOR CHOICE

- AAMA 2605 Superior Performing Organic Coatings**
 70% PVDF resin-based coatings. These coatings offer the best performance for outdoor exposure in terms of resistance to humidity, color change, chalk, and gloss retention. This is a long-lasting durable finish that withstands the harshness of nature and time. No other coatings on aluminum are superior.
- AAMA 2604 High Performance Organic Coatings**
 50% PVDF resin-based coatings. They offer good color and gloss retention for outdoor exposure. It offers good hardness and abrasion resistance. These coatings are often used for storefront, doors, or other high traffic areas.
- Colors are a digital representation only and are not a true reflection of the actual finished surface. In addition, if screens are not calibrated, colors are not likely to appear similar to physical finished product.
 DO NOT choose a color based on a digital representation. Physical samples are available upon request (some fees may apply).
