

Aluflam's True Aluminum Framing with CONTRAFLAM® One Interlayer Glass Technology

The clearest - up to 90 %
visible light transmission

Fire-rated for 60 to 120 minutes

Thinner for longer duration
(90 & 120 min.)

The Lightest - up to 28 %
weight savings

Aluflam North America, a leader in fire-rated aluminum/glass construction, announces a significant advancement in their true aluminum framing system. Utilizing Vetrotech's groundbreaking CONTRAFLAM® One interlayer glass technology, Aluflam can now provide improved performance in a single intumescent chamber solution across all performance ratings.

The Aluflam aluminum framing system is already the preferred choice for a fire-rated solution without compromising on aesthetics with its ability to seamlessly blend with non-fire-rated glazing systems. By combining CONTRAFLAM® One interlayer glass technology with Aluflam framing, projects can now incorporate much larger openings, representing an increase of up to 40%. This opens up new possibilities to feature bigger windows and brighter, more inviting interiors.
